OCTOBER 8 - 11, 2023
THESSALONIKI, GREECE

PRES'23

WELCOME

PRES'23 International Scientific and Organisation Committees welcome all participants to the twenty-sixth event in the series of PRES conferences in Thessaloniki, Greece. The PRES conference series was initiated by Professor Jiří Jaromír Klemeš and President of the PRES series. Its first version was organised in 1998 in collaboration with the Professor Zdeněk Buriánec and Professor Petr Stehlík within the framework of the CHISA congresses. Under the leadership of Professor Jiří J. Klemeš, the conference became an established independent venue in collaboration of the conference PRES'99 with ESCAPE-9, hosted jointly with Hungarian colleagues in Budapest, in 1999. The strong partnership with the Italian Association of Chemical Engineers resulted in the joint organisation of PRES events with the Italian Chemical Engineering Conference (ICheaP) and the publication of conference papers in a dedicated volume of Chemical Engineering Transactions (cited by SCOPUS). With a growing global presence, PRES events have become widely recognised and visited countries where strong communities in Process Integration, modelling, and optimisation have been developed – such as Kuching, Malaysia in 2015 and Tianjin, China in 2017. The other PRES venues in Canada (2003), Italy – multiple times, in Greece, China, Croatia, and Czechia, have built a strong international network of Process Integration and Pollution Reduction experts that provides a unique platform for scientific and engineering discussions, as well as forging project collaborations.

PRES returns to Greece in 2023 after two successful events in 2013 and 2019. This year the conference is co-organised by the School of Mechanical Engineering of Aristotle University of Thessaloniki (AUTH), Chemical Process Engineering and Energy Resources Institute (CPERI) of the Centre for Research and Technology – Hellas (CERTH), and the Sustainable Process Integration Laboratory – SPIL, NETME Centre, in the Faculty of Mechanical Engineering of Brno University of Technology – VUT Brno.

The aim of PRES'23 is to provide a platform for knowledge sharing and dissemination, reviewing the latest research developments and applications as well as cutting-edge results in new and emerging technologies in the fields of Process Integration, Mathematical Modelling and Optimisation as systematic approaches for energy savings and pollution reduction enabling sustainable process systems and cleaner production.

The conference attracted more than 375 abstracts authored by more than 1020 researchers from 52 countries. Of these, 79 papers are presented in the online platform, and 145 papers are in hybrid mode – presented on-site and online. Four plenary lectures from leading scientists in the field of Process Integration and Industrial Ecology set off the scientific discourse, followed by, 19 keynote presentations, 160 oral presentations, and 60 poster presentations. All papers have undergone a thorough peer-review process to ensure the highest technical quality, assisted by 93 expert reviewers. A special Poster Selection Committee will evaluate poster presentations for technical quality,

presentation skills, clarity of reasoning, the strength of arguments to the questions posed by the Committee members and finally poster content. A number of awards will be announced at the Gala-Awards Conference Dinner on October 11th. Selected papers from PRES'23 are published in Volume 103 of Chemical Engineering Transactions by AIDIC, with many more papers to be invited by the International Scientific Committee to submit full research manuscripts to Special Issues in leading scientific journals: Journal of Cleaner Production (IF 2022: 11.1), Energy (IF 2022: 9.0), Energies (IF 2022: 3.2, Open Access), Cleaner Energy Systems (Open Access). More special issues are being negotiated.

PRES'23 in Thessaloniki, Greece offers a rich social programme to facilitate networking among conference participants. Whether meeting old friends and colleagues or getting introduced to the PRES family for the first time, the welcome reception party on Sunday, October 8th sets the stage for the commencement of the scientific dialogue and friendly conversations. The daily coffee and lunch breaks not only immerse participants in the traditional local cuisine but mainly enable the continuation of discussions initiated during the technical sessions. A boat-cruise in Thessaloniki bay on Tuesday, October 10th aims to close the day in the relaxing fashion. The Conference Gala-Awards dinner planned for the evening of Wednesday, October 11th promises to conclude PRES'23 in style. The closing event includes a special entertainment programme, providing a relaxed environment to continue facilitating discussions, recognise excellent research contributions, and look forward to another successful PRES conference in Xi'an, China next year.

Thessaloniki is a city with a history of more than 2,300 years in which multi-culturalism is at the epicentre. Nowadays, a cosmopolitan modern city but with a unique character that residents and visitor feel they all belong in one big family. Explore the lively neighbourhoods, the little coffee-shops for vivid conversations, and the tavernas with simple and subtle tastes that make Thessaloniki a gastronomic megastar. Enjoy a long walk at the 5 km stretch of the seaside promenade, climb to the city medieval wall and fortification, visit the byzantine Christian Orthodox churches of magnificent architecture and absorb the serene sounds of byzantine chants.

PRES'23 greatly values the efforts of the conference chairs and the members of the International Scientific Committee. The Organising Committee worked hard to manage the participation of delegates from all over the world. The contribution of AIDIC in the publication of a dedicated Volume of Chemical Engineering Transactions and the use of the COMET platform by the SDEWES Centre is greatly appreciated. PRES'23 greatly appreciates the supporters of the Conference and especially the personnel of Machine Dynamics Laboratory in the School of Mechanical Engineering AUTH, the Process Systems and Implementation Laboratory CPERI/CERTH and the Sustainable Process Integration Laboratory – Faculty of Mechanical Engineering at VUT for all their hard work for the preparation of the Conference.

Prizes and Awards

PRES conferences have established a tradition of selecting the best poster presentations to researchers with a vital contribution towards enhancing our understanding of process integration for energy conservation, pollution reduction and related topics. Clarity of presentation and knowledge of the subject are additional selection criteria.

The PRES'23 best poster presentation Awards recipients will be selected by a Special Selection Committee from members of the International Scientific Committee. The award will be presented

during the Conference Gala Awards Dinner on Wednesday October 11th. Only personally presented winners will be awarded. In addition, the Best Paper “Jiří J. Klemeš” Award will be presented on October 9th.

Transportation

Transportation from the Makedonia International Airport (SKG) to Thessaloniki city centre is possible by public bus with an express line (2.0 € per person) or taxi (about 30 € - taxi can accommodate up to 3 people depending on their luggage). Bus routes from the airport run every hour.
